This contains a huge amount of information – don't panic you don't need to use ahrdly any until you want to.

- Note your “standard linking code” (red arrow).
- Use this to send people to the site – but it also contains your unuque information (on this example <http://www.drgeraldlewis.com/119.html> the /119/html is Monica's unique code.
- So if she sends an email to someone and says “take a look at this” <http://www.drgeraldlewis.com/119.html> - then they will be sent to the website, and if they join as a full member, then Monica will have the commission placed directly into her Paypal account automatically.
- Every month she will receive payment for the people she has sent and who join the site as full members.

You can also do the same with facebook, twitter, linked in etc – just paste the URL. But in addition there are linked posters you can use on social media.

First click 'marketing materials' (green arrow above) then “Social media campaigns) (blue arrow) .

This will open up a number of posters (see next page) which you can post on social media (facebook etc) to stimulate interest, and when people click on this they are sent to the website with you're your linking code attached.
